Career Objective

Motivated B.Tech student seeking opportunities to apply technical knowledge, problem-solving skills, and project experience in a professional environment while continuously learning new technologies.

Education

Bachelor of Technology (B.Tech)	2025–present
Ballari Institute of Technology And Management, Karnataka Current Semester: 3rd Semester	
PUC / 12th Standard	2025
SRS pu college, Chitradurga Percentage: 81.83%	
SSLC / 10th Standard	2023
Swami Vivekananda National School Percentage: 91.68%	

Technical Skills

Programming	C, Python
Web Technologies	JavaScript
Tools	Git, GitHub, VS Code, Overleaf
Database	MySQL
Other	Basic Machine Learning, LaTeX

Projects

Air Quality Monitoring using ThingSpeak

- Developed an IoT-based system to monitor air quality parameters.
- Used ThingSpeak for collecting, storing, and visualizing sensor data.
- Enabled real-time monitoring of air quality through an online dashboard.

Electricity Bill Generating System using Python

- Developed a Python-based system to calculate and generate electricity bills.
- Implemented user input, electricity unit calculation, and bill generation.
- Designed the system to simplify the electricity billing process.

Cinema Seat Booking System using C

- Developed a C-based system for managing cinema seat reservations.
- Implemented seat availability checking, booking, and cancellation features.
- Used arrays and functions to manage seat information efficiently.

Inventory Management System using C

- Developed a C-based system to manage inventory and product records.
- Implemented operations such as adding, searching, updating, and displaying products.
- Used structures and file handling concepts for managing inventory data.

Certifications

- **Forge Virtual Experience Program Certificate**
- **SQL and Relational Databases 101 (DB0101EN)** – IBM Skills Network / Cognitive Class Certificate
